

Arctic Dinosaurs of Alaska

Color Contest #2

©Fathom Publishing

Thescelosaurus greet each other as Pterosaurs fly in the background.

Dinosaur Colors: Nobody knows what color dinosaurs were, but likely they blended into their environment which would have been brown dirt and green plants. Think of animals today and their colors. The colors and markings vary a lot. They are not limited to brown and green. Mainly, have fun with coloring.

Prizes: *Arctic Dinosaurs of Alaska* paperback book.

Coloring Hints: Color using pencils, crayolas, marking pens or any method. Using a soft surface such as the side of a cardboard mailing envelope under your coloring paper will keep your results smoother. Avoid pressing hard because that will create dents in your paper.

Submitting: Either scan your drawing or take a high resolution image with your cell phone and upload to (check website for link). You may mail your drawing to us at Fathom Publishing, PO Box 200448, Anchorage, AK 99520-0448. Upload or mail your drawing by March 31, 2022.
